HOW IT WORKS

APPLICATION

Each dealer must go through a short application process including an initial deposit to place the dealer in the machine production schedule.

SETUP & TRAINING

Once accepted, the machine is built and shipped to the dealer. A SwedgeLock technician will provide 2 days of onsite setup and training services.

RENTAL FEE

Each dealer pays a fixed fee per month to rent the machine, which includes software updates and any maintenance requirements to keep machine operating.

MATERIALS

By entering the fabrication program, each dealer agrees to purchase all materials and accessories directly from SwedgeLock. Licensing programs available based on volume.

THE OPPORTUNITY

SwedgeLock's fabrication program gives dealers the opportunity to build screwless fence and railing products in-house. Cost savings will be substantial versus buying retail and will give dealers flexibility to build up to 100+ different models.

THE BENEFITS

- ⦿ Increased margins/profits
- ⦿ Builds up to 7 different heights
- ⦿ Builds up to 99" length panels
- ⦿ Builds flat bottom and 6" drop styles
- ⦿ Builds 9 different models
- ⦿ Panel customization available
- ⦿ Machine footprint takes up less than **100 sq ft**
- ⦿ Minimal on-site fabrication
- ⦿ Build it as you need it reduces inventory space
