

MISSION STATEMENT

SwedgeLock's purpose is to create quality custom aluminum fence and railing products with the highest standards of integrity and craftsmanship. SwedgeLock will use only the highest quality components in our system with an emphasis on the longevity and safety of the end product. Providing first class customer service is our motto, not our goal, striving to meet all of our customers needs.

LIMITED LIFETIME WARRANTY

SwedgeLock will repair or refinish any defect in manufacturer's finish, material or workmanship. This includes protection against peeling, chipping, corroding, cracking or blistering of the finish. This warranty is deemed invalid in the event of misuse, alteration, abuse, or acts of God. See warranty for specific details. Warranty is non-transferrable.

SWEDGELOCK
American Owned and American Made

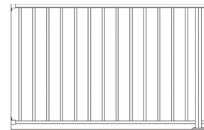

SINCE 1990

OUR STORY

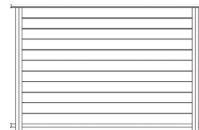

SwedgeLock was the first no screw aluminum fence and railing product ever produced and it was created to eliminate the welding and screwing together of aluminum fence and railing panels. The company was started in the late eighties to primarily build an aluminum railing system for the high rise condo projects in South Florida. So this product has been installed on high rise and multifamily projects for over 30 years and is a proven product. The Swedgemaster 4000 was originally built as a manual assembly table and now has evolved into a fully automated assembly machine. So we are bringing the ability to fabricate SwedgeLock aluminum fence and railing to the world!
